PROCESS RUNNER

Powerful SAP SD integration that works out of the box

Solution Overview

Innowera's Process Runner dramatically reduces on-going costs and optimizes efficiencies by automating day-to-day data maintenance and migration operations between your *SAP* and *Microsoft Excel systems.*

Audience

CHROs, Corporate/Divisional SD, Data and Process owners, SAP business analysts, SAP data conversion teams, SAP deployment teams.

Solution Benefits

- Upload and download data, information and events
- Supports mass data creation, changes, updates, verification, etc
- Point and click interface - no programming or scripting required
- Works out of the box

"Smart Solutions for Your SAP - SD Automation Needs"

Process Runner offers broad coverage for SAP SD master and transactional data creation, maintenance, analysis and monitoring.

Process Runner enables automation for SAP Transaction, BAPI, GUI Scripting and Data Extraction tasks from one seamless application.

SOX Compliant:

Process Runner implementation will be as SOX compliant as your SAP implementation is. The best part that your auditor (apart from BASIS) will love you as there is no custom ABAP program involved

Ready to Run Templates:

Process Runner has ready to use templates that will get you started in no time. We have hundreds of templates and we are frequently adding more to our Cloud sample store. Templates allow you to start using popular SD transactions like VB21, VB22, VK11 etc. immediately. You will also have access to ready to use templates for some of the popular SD Business APIs. These templates come with sample data stored in Excel format with all required recording and mapping already done. Download free trial now and immediately feel the power of simplification.

Broad Coverage – Use Transactions or BAPIs:

Process Runner allows you to use from hundreds of SAP transaction codes such as VB21, VA22, VB11, VC01, VC02, VK11, VK12, VK14 and many other. You may also choose to use Business APIs that SAP already delivered in your system.

Supports different types SD transactions such as:

1. Create Sales order (VA01)
2. Change and manage sales order (VA02)
3. Create condition records (VK11)
4. Change condition records (VK12)
5. Create condition records with reference (VK14)

and thousands of other transactions, BAPIs, tables including customized one

Download Sales & Distribution data:

You can extract SD tables and views using Process Runner Data Extractor technology. You can even download Long Text and entire business objects using BAPI and other technology offered in Process Runner. With Innowera extension, you can also extract data from SD Cluster tables (i.e. VA03, VA21, VA22, VA23).

### Sales & Distribution Master Data Record Management:

With increasing competition, agility and pressures to maintain the bottom line growth Process Runner is a perfect tool for updating and handling your SD master data with automation. Using Process Runner frees up those vital resources that could be used more attractively.

Zero ABAP - Works out of the Box:

Here comes the best part. Process Runner works out of the box. You install on your desktop and if you have required SAP security, you are ready to go in under 30 minutes.

How it Works

Process Runner is a core enabler, driving bottom-line results throughtout the data management process across your SAP systems and Excel:

Efficiency. Coverage. Ease-of-Use: PROCESS RUNNER

Solution Highlights

Click and Run - No Programming Required:

Process Runner supports SAP data management by recording, mapping and executing across Transactions, BAPIs, RFMs, and GUI Scripting. Process Runner supports all SAP releases from 4.6c and supports standard as well as custom transactions, BAPIs and RFMs.

Smart and Broad Mapping Types:

Process Runner provides an intuitive user-experience and supports multiple mapping types for custom and standard Transactions, RFMs, BAPIs and GUI scripted processes across the entire SAP landscape.

On-Demand Scheduling:

Advanced frameworks that enable automation and scheduling of script execution for flexibility and control.

Embedded Excel Books:

Excel books embedded in Process Runner provide powerful and robust functionality without having to leave Process Runner for ease-of-use.

Share and Collaborate:

Integrated central file/ template repository. Enables users to share, manage and control Process Runner files to enhance team productivity.

Parallel Processing:

Enables parallel script execution across multiple transactions, BAPIs, RFMs or GUI Scripted processes for high efficiency and productivity.

Data Checks & Validation:

Perform data existence and validation checks to enable accuracy while uploading data to SAP systems.

Multi-lingual Support:

Process Runner supports European languages such as French, German and Spanish. In addition, Process Runner is Unicode compliant and supports Japanese, Chinese and other kanji languages.

Highly Secure & Scalable:

Leverages and preserves in-built SAP systems security to provide application integrity. Process Runner is built on a secure framework and is scalable for large enterprises.
