How it Works

Process Runner LITE is suitable for personal use and helps replacing manual data management process between SAP and Excel:

PROCESS RUNNER LITE

1. Record

to build transactions

2. Map

SAP fields to Excel using drag & drop graphical interface

3. Execute

the process in the SAP system that you specify

Secure Automation Platform

Solution Highlights

Click and Run - No Programming Required:

Process Runner Lite supports SAP data management by recording, mapping and executing across SAP Transactions. Process Runner Lite supports most popular SAP releases and supports standard as well as custom transactions.

Smart and Broad Mapping Types:

Process Runner Lite provides an intuitive user-experience and supports multiple mapping types for custom and standard transaction processes across the entire SAP landscape.

Embedded Excel Books:

Excel books embedded for powerful and robust functionality without having to leave Process Runner Lite for ease-of-use.

Data Checks & Validation:

Perform data existence and validation checks to enable accuracy while uploading data to SAP systems.

Highly Secure:

Leverages and preserves in-built SAP systems security to provide application integrity. Process Runner Lite is built on a secure framework suited for individual needs that is automatically compliant to your existing environment.

Zero ABAP - Install and Run:

Process Runner Lite works out of the box with SAP standard components. No ABAP installations, changes or transports are required. Simply download and install Process Runner Lite on your desktop. Process Runner Lite will use your existing SAP credentials to login.

Broad System Support:

Process Runner Lite supports most widely used SAP and Excel releases. Process Runner Lite supports SAP Enterprise 4.7, ECC5, ECC6 as well as popular new dimension SAP systems. It supports SAP GUI 7.1 and higher. Process Runner Lite also supports Excel 2003, Excel 2007 and Excel 2010.
